

DAILY LUNAR EPHEMERIS & TWILIGHT VISIBILITY

Observational Site: Passikudah Beach, Sri Lanka (Coordinates: ~7.93° N, 81.56° E) | July 14–31, 2026

DATE (JULY 2026)	MOONRISE TIME	MOONSET TIME	ILLUMINATION % (AT NOON)	SUNSET TIME	VISIBILITY STATUS (7:00 PM – 9:00 PM WINDOW)
July 14	5:32 AM	6:33 PM	0.1% (New Moon)	6:25 PM	Not visible (sets prior to start of observation window).
July 15	6:37 AM	7:29 PM	1.3%	6:25 PM	Extremely low in West; sets at 7:29 PM. Beautiful twilight crescent.
July 16	7:37 AM	8:20 PM	5.4%	6:25 PM	Slender crescent visible low in West; sets at 8:20 PM.
July 17	8:32 AM	9:06 PM	12.1%	6:25 PM	Visible in West for entire observation window. Perfect crescent sky.
July 18	9:24 AM	9:48 PM	20.5%	6:25 PM	Visible in West-Southwest for entire window. Safe for dark-sky objects.
July 19	10:12 AM	10:28 PM	30.1%	6:25 PM	Visible high in Southwest. Clear mountain background stars emerge.
July 20	10:59 AM	11:09 PM	40.3%	6:24 PM	Visible high in Southwest; bright crescent skyglow starts to appear.
July 21	11:46 AM	11:49 PM	50.6% (First Quarter)	6:24 PM	Highly visible; near meridian. Ideal target for telescope observers.
July 22	12:33 PM	–	60.7%	6:24 PM	Visible high in Southern sky. Moderate skyglow present.
July 23	1:22 PM	12:32 AM (July 24)	70.1%	6:24 PM	Highly visible; bright waxing gibbous. Significant horizon skyglow.
July 24	2:13 PM	1:17 AM (July 25)	78.6%	6:24 PM	Highly visible; waxing gibbous dominates twilight sky.
July 25	3:04 PM	2:05 AM (July 26)	86.1%	6:24 PM	Highly visible; intense lunar background skyglow washes faint stars.
July 26	3:56 PM	2:55 AM (July 27)	92.1%	6:24 PM	Sky dominated by bright Moon at high altitude. Beautiful lunar scenery.
July 27	4:46 PM	3:47 AM (July 28)	96.6%	6:24 PM	Heavy twilight skyglow. Obscures all but the brightest constellations.
July 28	5:35 PM	4:39 AM (July 29)	99.2%	6:24 PM	Extremely bright lunar disk; rises in East slightly before sunset.
July 29	6:21 PM	5:30 AM (July 30)	99.9% (Full Moon)	6:24 PM	Full Buck Moon. Rises in East at 6:21 PM. Spectacular ocean reflection.
July 30	7:04 PM	6:20 AM (July 31)	99.9%	6:24 PM	Rises over eastern horizon at 7:04 PM; highly visible across coast.
July 31	7:45 PM	7:08 AM (Aug 1)	98.6%	6:23 PM	Waning gibbous; rises in East at 7:45 PM. Heavy coastal lighting.
